Gentlemen:

We possess two Presto Model 10-B turntables which are vintage c1950. The rubber rims around these tables are now dry rotted. These are the rims that transmit the meter power to the turntable. The instruction booklet tells me that I should have these replaced by Presto.

I wonder what arrangements must be made to have these replaced and the approximate cost of replacement. Any other information pertaining to these turntables would be appreciated.

Sincerely yours,

Howard Feldmesser, Chief Engineer

Gentlemen:

Please send me all literature you may have concerning your entire line of commercial broadcasting audio equipment. Please pay special attention to your remote console model A-10B and remote studio model A-50B as advertised in the February 1, 1965 issue of College Radio. Please include a price list with available discounts, if any.

Thank you very much for your kind cooperation.

Sincerely yours,

Howard Feldmesser
Chief Engineer

Stu Kaye
% WAEB Radio
Allentown, Pa.

Dear Stu,

Here is a copy of the show that we aired twice today. It contains bits of the concerts and interviews with Herman's Hermits and Wayne Fontana and the Mindbenders. This is how it went on the air, and absolutely no other material concerning either group was aired by us.

We are in constant contact with the Father, and are making plans to come out to these Bandstands as money and time allow.

I hope that you approve of the show, and I also hope that you will return this tape or a comparable replacement. We certainly enjoyed working with you and the two groups, and on behalf of Mike Jarmus, Ed Osborne, and myself, I sincerely thank you for your help and cooperation.

Sincerely yours,

Howard Feldmesser, Chief Engineer
